

NSFW-Visionary-Scanner Fix Plan

“One Touch and Done” Approach - Fixes Grouped by File

P0 Critical Fixes

1. src/pages/AdminDashboard.tsx

Issue: Admin Dashboard accessible without authentication - /admin route exposed

Fix: Add authentication guard using useAuth hook to redirect unauthenticated users

```
// Add: Import useAuth and useNavigate  
// Add: Early return with redirect if user is not admin
```

2. src/dlc/core/DLCManager.ts

Issue: Age Verification doesn't persist (fails silently)

Fix: Add localStorage fallback for age verification persistence

```
// Add localStorage write on successful verification  
// Add localStorage read as fallback when DB check fails
```

3. src/dlc/context/DLCContext.tsx

Issue: Age Verification state doesn't initialize from localStorage

Fix: Initialize isAgeVerified state from localStorage if DB unavailable

P1 High Priority Fixes

4. .env (Already Fixed)

Issue: NSFW routes return 404

Status:  VITE_DISTRIBUTION_CHANNEL=direct already exists

5. src/pages/Index.tsx (or indexTabContent.tsx)

Issue: Health Tab returns 404 within Progress page

Fix: Ensure “health” tab routes to valid content component

6. src/contexts/AchievementContext.tsx

Issue: Achievement System stuck loading (infinite spinner)

Fix: Add timeout fallback and error handling for initialization

7. src/contexts/AuthContext.tsx

Issue: Session persistence issues across navigation

Fix: Improve session restoration with localStorage fallback

Implementation Order

- 1.  Check .env (already has VITE_DISTRIBUTION_CHANNEL=direct)
- 2.  AdminDashboard.tsx - Add auth guard
- 3.  DLCManager.ts + DLCContext.tsx - Fix age verification persistence
- 4.  tabRouting.ts - Fix health tab routing
- 5.  AchievementContext.tsx - Fix loading issue
- 6.  AuthContext.tsx - Fix session persistence
- 7.  Build debug APK (in progress)

Files to Modify Summary

File	Fix Type	Priority
src/pages/AdminDashboard.tsx	Auth Guard	P0
src/dlc/core/DLCManager.ts	Age Verification Persistence	P0
src/dlc/context/DLCContext.tsx	Age Verification Init	P0
src/pages/indexTabContent.tsx	Health Tab Route	P1
src/contexts/AchievementContext.tsx	Loading Timeout	P1
src/contexts/AuthContext.tsx	Session Persistence	P1
