

NSFW-Visionary-Scanner Setup Audit Report

Date: February 10, 2026
Project: NSFW-Visionary-Scanner
Location: /home/ubuntu/nsfw-visionary-scanner

1. Dependencies Installation

✔ **Status:** Completed

```
npm install
```

- Installed 1141 packages
- 7 vulnerabilities detected (1 moderate, 6 high) - recommend running `npm audit fix`
- Some deprecated packages noted (sourcemap-codec, tar, node-domexception)

2. Environment Configuration

✔ **Status:** Configured

.env File Contents

Variable	Value	Status
VITE_SUPABASE_URL	https://thajylrvfzjmerqqk-mjv.supabase.co	✔ Set
VITE_SUPABASE_PUBLISHABLE_KEY	eyJhbG... (truncated)	✔ Set
VITE_SUPABASE_PROJECT_ID	thajylrvfzjmerqqkmjv	✔ Set
VITE_APP_VERSION	nsfw	✔ Set
VITE_DISTRIBUTION_CHANNEL	direct	✔ Set
VITE_ADMIN_EMAIL	slkchick_360@yahoo.com	✔ Set
VITE_ADMIN_SUPER_EMAIL	n8ter8@gmail.com	✔ Set
VITE_PARTNER_PAIR_EMAIL_1	n8ter8@gmail.com	✔ Set
VITE_PARTNER_PAIR_EMAIL_2	slkchick_360@yahoo.com	✔ Set

Partner Sync Configuration

- Partner pair auto-connection is configured for both admin emails
- Both emails bypass email verification (configured in code)

3. Supabase User Roles

 **Status:** Users Not Found (Pending Sign-up)

Role Assignment Script

Created: `scripts/add-user-roles.ts`

Attempted Assignments:

Email	Target Role	Status
<code>n8ter8@gmail.com</code>	<code>super_admin</code>	 User not in profiles table yet
<code>slkchick_360@yahoo.com</code>	<code>admin</code>	 User not in profiles table yet

Action Required:

1. Users must sign up first in the application
2. After sign-up, run: `npx tsx scripts/add-user-roles.ts`
3. The script checks for existing roles before adding (idempotent)

Database Schema:

- `user_roles` table exists with `app_role` enum
- Supported roles: `user`, `pro`, `admin`, `super_admin`
- Super admin role migration: `20251215030000_add_super_admin_role.sql`

4. NSFW Navigation Audit

 **Status:** All routes verified

Navigation Structure

Sidebar Navigation (`src/components/appShell/AppSidebar.tsx`)

The NSFW Content category is conditionally rendered based on:

- `BUILD_ALLOW_ADULT_BUNDLE` flag
- User has NSFW DLC unlocked OR is `super_admin`
- Age verification completed

Route Definitions (src/App.tsx)

Route	Component	Build Flag Required
/nsfw	NSFWDashboardPage	BUILD_ALLOW_ADULT_BUNDLE
/nsfw/landing	NSFWAddOnsLandingPage	BUILD_ALLOW_ADULT_BUNDLE
/nsfw/topics	NSFWTopicsPage	BUILD_ALLOW_ADULT_BUNDLE

NSFW Menu Items & Tab Mapping

Menu Item	Tab ID	Component	Status
Intimate Education	nsfw-cock-worshiping	LazyNSFWEducationHub	✔ Working
NSFW Videos	nsfw-videos	LazyNSFWVideoContent	✔ Working
NSFW Forum	nsfw-forum	LazyNSFWCommunityForum	✔ Working
NSFW Analytics	nsfw-wellness-analytics	LazyNSFWSexualWellnessAnalytics	✔ Working
NSFW Advanced	nsfw-advanced	LazyNSFWAdvancedFeatures	✔ Working

Navigation Catalog (src/lib/navigation/navCatalog.ts)

All NSFW items are defined in the NAV_CATEGORIES array under “NSFW Content” category with nsfwOnly: true flag.

DLC Feature Gates

Each NSFW tab is wrapped with:

- 1. NsfwSessionGate - Session-level NSFW access control
- 2. DlcFeatureGate - DLC purchase verification

Feature	DLC Required
intimate_education	Intimate Education add-on
video_library	Video Library DLC
private_forum	Private Community DLC
wellness_analytics	Wellness Analytics DLC

Broken Routes / Missing Components

✅ **None Found** - All NSFW menu items have corresponding routes and components.

5. Dev Server

✅ **Status:** Running

- URL: `http://localhost:8080`
- Configuration fix applied: Added `cacheDir: "node_modules/.vite"` to `vite.config.ts`

Server Configuration

```
{
  host: "0.0.0.0",
  port: 8080,
  strictPort: true,
  allowedHosts: true,
  cors: true
}
```

Summary

Task	Status
Install npm dependencies	✅ Complete
Configure .env file	✅ Complete
Add Supabase user roles	⚠️ Waiting for user sign-up
Audit NSFW navigation	✅ Complete - No issues
Start dev server	✅ Running on port 8080

Next Steps

1. Have admin users sign up in the application
2. Run `npx tsx scripts/add-user-roles.ts` to assign roles
3. Consider running `npm audit fix` to address vulnerabilities

Key Files Reference

- Admin manager: `src/lib/auth/adminManager.ts`
- Feature access: `src/hooks/useFeatureAccess.tsx`
- Partner sync: `src/lib/partners/partnerSync.ts`
- NSFW routes: `src/App.tsx`
- Sidebar nav: `src/components/appShell/AppSidebar.tsx`
- Nav catalog: `src/lib/navigation/navCatalog.ts`

- Tab content: `src/pages/indexTabContent.tsx`
