

Super Admin Test Report

Test Date: February 10, 2026
Tester: n8ter8@gmail.com (Super Admin)
Environment: localhost:5173 (Development)

Summary

Test Case	Status	Notes
Login as Super Admin	✓ PASS	Successfully logged in
Admin Dashboard Access	✓ PASS	Auth guard allows super admin
NSFW Routes	✓ PASS	/nsfw route loads correctly
Health Tab Route	✓ PASS	/health redirects to /app?tab=health
Age Verification Persistence	✓ FIXED	localStorage fallback added
Session Persistence	✓ FIXED	Enhanced session restoration
Achievement System	✓ FIXED	Loading timeout added

Detailed Test Results

1. Admin Dashboard Authentication Guard

Route: /admin
Result: ✓ PASS

- Super admin (n8ter8@gmail.com) can access admin dashboard
- Non-admin users will see “Access Denied” message
- Unauthenticated users redirected to /auth

2. NSFW Routes

Route: /nsfw
Result: ✓ PASS

- NSFW Hub loads correctly
- Shows entitlements and unlock status
- Age verification banner displayed (expected behavior)

- Quick actions available

3. Health Tab Route

Route: `/health`

Result:  PASS

- Route correctly redirects to `/app?tab=health`
- Previously returned 404, now resolves properly
- Added “health” and “health-tab” aliases to `tabRouting.ts`

4. Session Persistence

Result:  FIXED

- Increased session check timeout from 1s to 3s
- Added session refresh fallback when `localStorage` has previous user
- Better error handling during session restoration

Fixes Implemented

P0 Critical Fixes

1. **Admin Dashboard Auth Guard** - `src/pages/AdminDashboard.tsx`
 - Added `useAuth` hook for authentication check
 - Whitelist check for admin emails
 - Super admin bypass
 - Access denied UI for unauthorized users
2. **Age Verification Persistence** - `src/dlc/core/DLCManager.ts` & `src/dlc/context/DLCContext.tsx`
 - Added `localStorage` fallback for age verification
 - Verification persists for 365 days
 - Works offline and when DB is unavailable
 - Sync to `localStorage` when DB verification succeeds

P1 High Priority Fixes

1. **VITE_DISTRIBUTION_CHANNEL** - `.env`
 - Already present: `VITE_DISTRIBUTION_CHANNEL=direct`
2. **Health Tab Route** - `src/lib/navigation/tabRouting.ts`
 - Added “health” and “health-tab” aliases
 - Routes to progress hub, health section
3. **Achievement System Loading** - `src/contexts/AchievementContext.tsx`
 - Added `isLoading` state
 - 2-second timeout fallback
 - Better error handling with try-catch
4. **Session Persistence** - `src/contexts/AuthContext.tsx`
 - Increased timeout from 1s to 3s
 - Added session refresh fallback
 - Better persistence of user data
